

I PASS THE CLAMP OFF

Patient Handoff Tool for Perfusionists

I	Isolation precautions	contact, droplet, airborne
P	Patient name/Procedure	surgical approach, cannulation, backup plan, target flows
A	Age/Allergies	medications, adverse reactions, associated risks
S	Stage of the procedure	preoperative, perioperative, postoperative, surgical status
S	Status of temperature	target temperatures, current temperatures, rewarming rate
T	Transfusion	blood type, targets, product use, availability
H	History	symptoms, risk factors, diagnosis, prior procedures, preoperative medications
E	Equipment condition	mechanical concerns or issues
C	Circuit	oxygenator, tubing size and coating, cardioplegia, shunts, hemoconcentrator, accessories
L	Lab values and targets	hematocrit, blood gasses, electrolytes, enzymes, targets
A	Anticoagulation	status, targets, heparin use, alternative anticoagulants, blood components
M	Medications	vasoconstrictors, vasodilators, cardioplegia, electrolytes, antiarrhythmics, colloids
P	Pump settings	FiO ₂ , sweep, blood flow, vacuum, RPMs, timers, shunts
O	Other conditions or concerns	jehovah's witness, sickle cell anemia, pregnancy, sepsis, DIC
F	Fluid status	I/Os, crystalloid use, ultrafiltrate amount and rate, urine
F	Final thoughts
