

# Intra-Aortic Balloon Pump Formative Evaluation

## OVERVIEW

Healthcare Human Factors (<https://humanfactors.ca/>) is evaluating the usability and use safety of an intra-aortic balloon pump. We require users to provide feedback on the design and workflow of the device to ensure it satisfies clinical needs and is easy to use. We are currently recruiting **critical care nurses, perfusionists, ground and flight paramedics, and transport nurses** to participate in this study.

## DATES

January 29 – February 2, 2024

## LOCATION

45 Barbour Pond Drive  
Wayne, NJ 07470

## COMPENSATION

You will receive a **\$1000** check for your participation in the study, which will be delivered via mail.

## TIME COMMITMENT

You will be asked to complete and attend the following:

- 3.5 hours of self-paced e-learning modules
- 2-hour in-person hands-on training session
- 4-hour in-person testing session in a simulated environment

## HOW TO SIGN UP

If you are interested in participating, please complete the following questionnaire:

<https://machform2.ehealthinnovation.org/view.php?id=338966>

If you have any questions about this evaluation, please contact the evaluation facilitator:
